Digital transformation

Social transformation

Environmental transformation

## 1. Introduction 5

- 1.1. Roles of digitisation in operations 9
- 1.2. IT's informing function 12
- 1.3. Information and value 17
- 1.4. Type of business determines IT needs 21
- 1.5. Digital transformation and fundamental rethinking 23
- 1.6. Significance of systematic decision-making 25
- 1.7. A global perspective 26
- 1.8. The structure of the book 26

## 2. Organisational goals, strategies and digitisation 29

- 2.1. Organisational goals 29
  - 2.1.1. Goals, time perspectives and goal conflicts –examples 30
  - 2.1.2. Organisational versus personal goals 35
  - 2.1.3. Financial goals 36
  - 2.1.4. Non-financial goals 37
  - 2.1.5. To balance different goals 39
- 2.2. Organisational strategies 40
  - 2.2.1. Challenges in strategy work 40
  - 2.2.2. An example of strategy formulation 42
  - 2.2.3. Strategy approaches 44
  - 2.2.4. Coordinating strategies on different organisational levels 46
  - 2.2.5. Strategic dialogues 49
- 2.3. Chapter summary 49
- 2.4. Reading tips 50

## 3. Business models and digitisation 53

- 3.1. The relationship between strategy and business model concepts 53
- 3.2. The different parts of a business model 55
- 3.3. Business model digitisation 57
  - 3.3.1. Value proposition 57
  - 3.3.2. Partners, subcontractors, activities and resources 59

- 3.3.3. Customers, customer relations and customer channels 61
- 3.3.4. Revenues and costs 64
- 3.4. Digital business models 66
  - 3.4.1. The roots of digital innovations 66
  - 3.4.2. Digital intermediaries and network builders 68
  - 3.4.3. Some common denominators for digital business models 75
- 3.5. Chapter summary 76
- 3.6. Reading tips 78

## 4. The organisation of digitisation 82

- 4.1. Background: A few questions surrounding digitisation 85
- 4.2. Who works with digitisation? 88
  - 4.2.1. Who decides? 89
  - 4.2.2. Combining perspectives from IT and operations 91
- 4.3. What does working with digitisation entail? 96
- 4.4. Social aspects of coordinating IT specialists and operations 100
- 4.5. Outsourcing and partnership with suppliers 106
  - 4.5.1. What does the outsourcing of IT entail? 106
  - 4.5.2. Reasons for outsourcing 111
  - 4.5.3. Reasons against outsourcing 117
- 4.6. Management of outsourcing 120
  - 4.6.1. Procurement competence 120
  - 4.6.2. Continuous monitoring and management 122
- 4.7. Chapter summary 125
- 4.8. Reading tips 126

## 5. Structured decisions and decision processes 132

- 5.1. Rough analysis and improvement potential 135
- 5.2. The decision process 137
  - 5.2.1. Identification and structuring 137
  - 5.2.2. Information capture and modelling 138
  - 5.2.3. Evaluation 141
  - 5.2.4. Refinement of the decision basis 142
- 5.3. Extensions of the analysis 144
- 5.4. Chapter summary 145

## **6. Procurement competence 146**

- 6.1. The complexity of the procurement process 147
- 6.2. The evaluations of tenders 148
- 6.3. Evaluation criteria 151
- 6.4. Unreasonable precision 153
- 6.5. Shortcomings in the handling of value scales 155
- 6.6. Weights and value scales 156

## **7. Probability and risk management 166**

- 7.1. Probabilities and decisions 166
- 7.2. Tree models 170
- 7.3. Realism in decision models 173
- 7.4. Sensitivity analyses 179
- 7.5. Tool support 183
- 7.6. Chapter summary 184
- 7.7. Reading tips 185

## **8. Project portfolios 188**

- 8.1. The project portfolio and the organisation 189
- 8.2. Are we investing in the right things? 190
  - 8.2.1. Quantitative models 192
  - 8.2.2. Qualitative models 199
  - 8.2.3. Balancing the portfolio 201
  - 8.2.4. Strategic alignment and agility 207
- 8.3. Are we using our capacity correctly? 209
- 8.4. How well do we implement projects? 211
  - 8.4.1. Follow-up during project execution 211
  - 8.4.2. Follow-up after project completion 212

## **9. To manage projects 216**

- 9.1. Goals and definitions 216
- 9.2. Project models 217
  - 9.2.1. Sequential project models 217
  - 9.2.2. Problems with the waterfall model 220
  - 9.2.3. Iterative methods – focus on utility 221
  - 9.2.4. Problems with agile 227
  - 9.2.5. What to use and when 230
- 9.3. Common skills, tools and methods 231
  - 9.3.1. Conducting a feasibility study 231
  - 9.3.2. Working with and managing requirements 232
  - 9.3.3. Time estimates 234
  - 9.3.4. Risk analyses 236
- 9.4. Chapter summary 249
- 9.5. Reading tips 250

## **10. Globally sustainable digital transformation 252**

- 10.1. Digitisation in the higher education sector 255
- 10.2. The need for a higher education process framework 255
- 10.3. Align higher education frameworks to the SDGs 258
- 10.4. Chapter summary 260
- 10.5. Reading tips 261

## **11. What is this all about? 266**

- 11.1. The ecology perspective and a strategic grip on digitisation 267
- 11.2. The business focus 272
- 11.3. Strategy, goal and business model 274
- 11.4. Organising of competences and resources 276
- 11.5. Decision-making and risk 277
- 11.6. Project portfolio and implementation 281
- 11.7. Sustainable development 282
- 11.8. Digital transformation and value 283
